

# USELESS

A SURPRISINGLY USEFUL CRYPTO

V3 LITEPAPER

# OUR JOURNEY

Useless was originally launched as nothing more than a meme token with no utility, but was salvaged by the community and relaunched as a utility token on June 9th 2021.

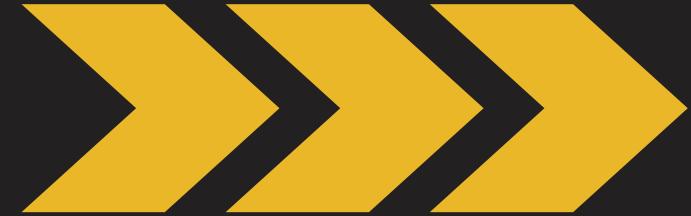

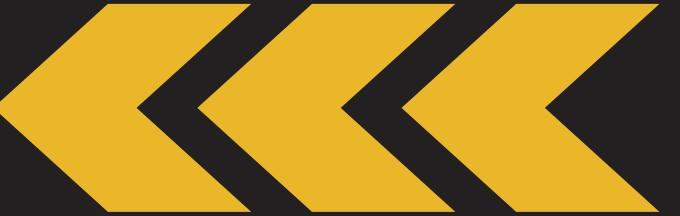

The All For One app showcases Useless token's utility, displays charting for tokens and transactions, and provides a non-custodial multichain wallet for more than 5,000 active beta testers as of March 2022.

# SITUATION ANALYSIS

The potential of the DeFi space is constricted by reliance on centralized exchanges like Binance, Coinbase, Crypto.com, and others.

We believe that crypto can only reach its full potential if we can unlock the crypto market to be available beyond these gatekeeping exchanges.

# OUR VALUES

Transparency

Honor & Integrity

Decentralization

Under-promise, Over-deliver

Disruption & Innovation

Simplicity

Community

Humility

Business agility

Humor

# OUR MISSION

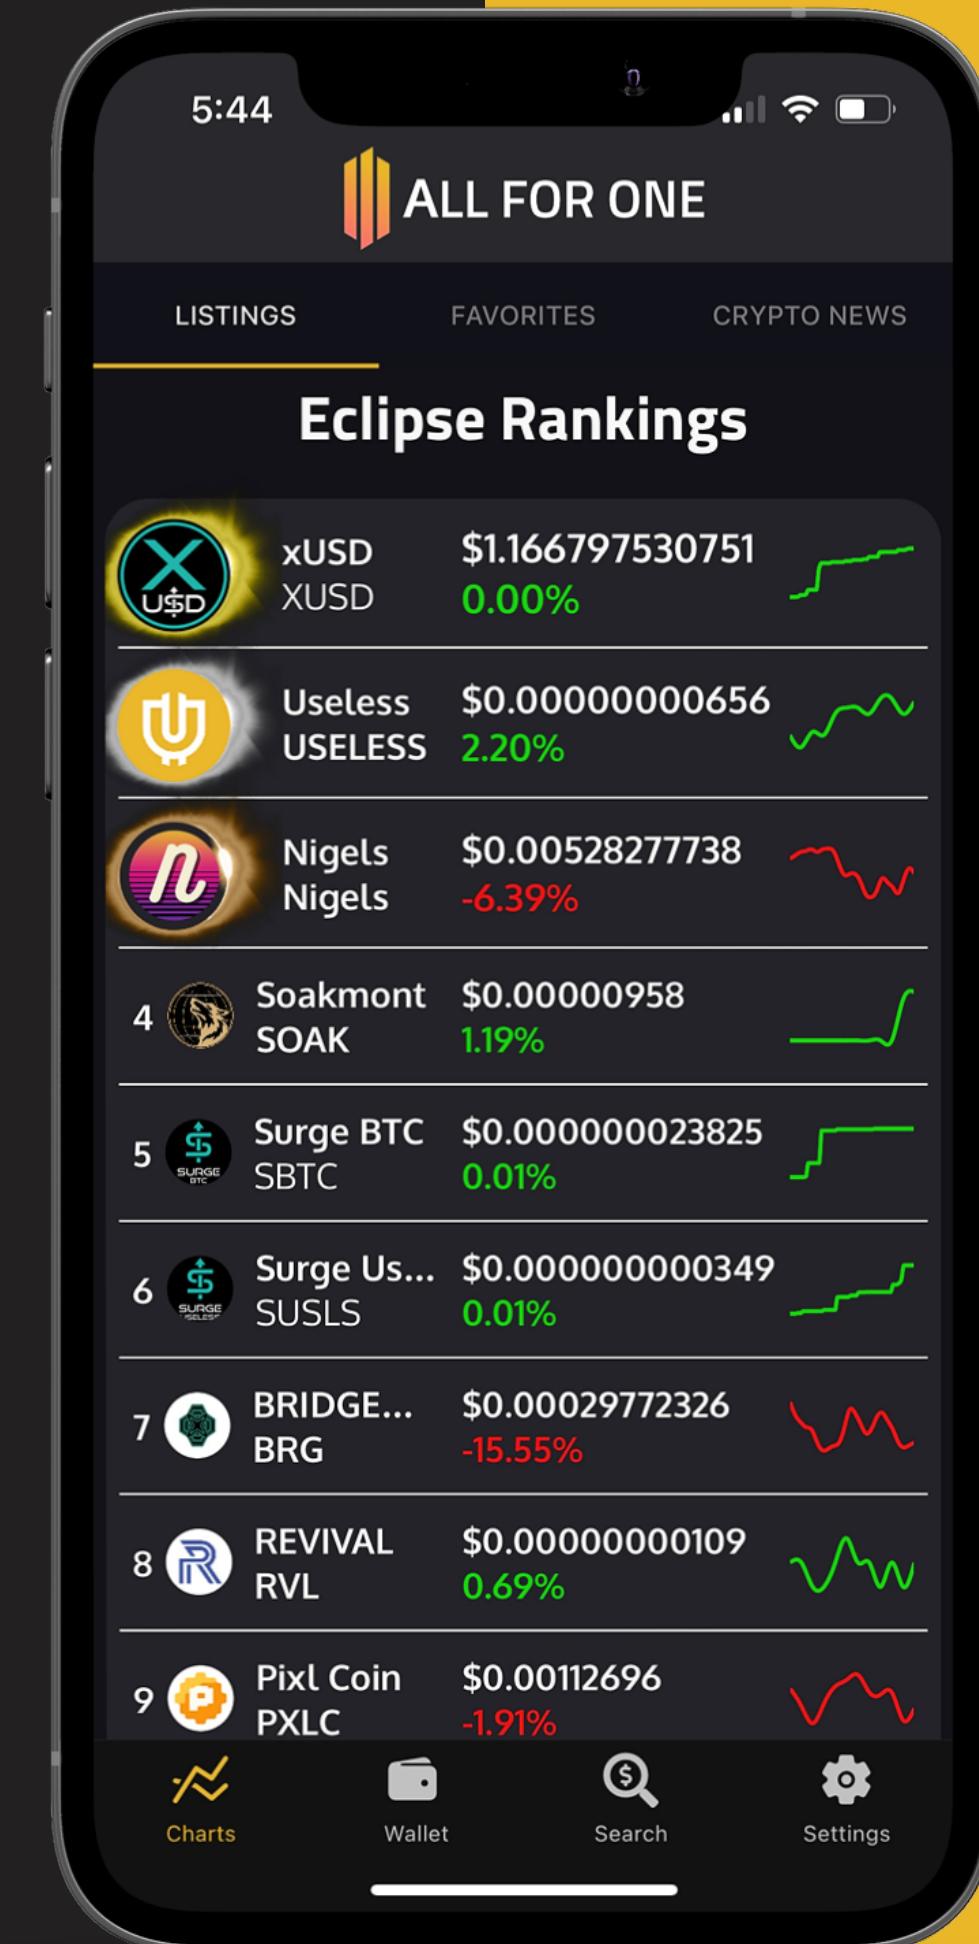

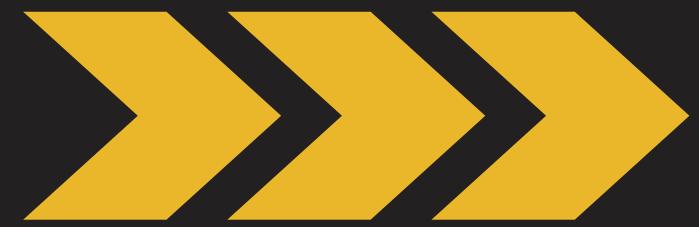

To reclaim individual finance  
and digital ownership by  
providing accessibility to the  
crypto space.

# OUR UTILITIES

Unlocking premium features in our products:

- All For One Crypto App
- Eclipse
- uCrypto

# OUR PRODUCT

The All For One app charts tokens, lets you track transactions, whale movements on tokens, and save your favorite tokens for easy watching.

To be launched in Spring 2022: A non custodial multichain wallet that lets you have all your crypto assets in once place, without having to keep your assets in a centralized exchange.

# OUR TEAM & YOUR SECURITY
